Claims 1-24 are presented for examination.

The amendments and remarks filed on October 14, 2008 have been received and entered.

Claims 1-10 and 24 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Nelson et al. (US 4,490,389) in view of Fritch et al. (US 5,445,827) for the reasons set forth on pages 2-5 of the office action of November 5, 2007.

Applicant's arguments and remarks have been carefully considered, and are deemed to be persuasive regarding the 112 first paragraph rejection. As a result such rejection is hereby withdrawn.

Applicant's arguments regarding the obviousness rejection have been noted, however they are not deemed to be persuasive. Applicant alleges criticality to the specific PH of the claimed invention in comparison with the higher PH taught by the prior art. Applicant's attention is drawn to Nelson et al. reference, which teaches the use of a PH of "between about 6-9". The use of the term about indicates that it can be less or more than the recited value.. Therefore, the lower PH of the Nelson Patent reads on the highest PH value of the claimed invention. For the above reasons the prior rejection sustains.

Claims 11-23 at present time are considered to be allowable.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
